

14th International Symposium on BioOrganic Chemistry - Milan, June 21-24, 2026

ISBOC-14 List of Posters

(Poster Number, Title, Presenting Author)

- P - 1 **A calixarene-based fluorescence indicator displacement assay for the selective detection of bacteria**
Cristina Airoidi
- P - 2 **Self-Fluorescent Carvone-Based Polyesters Enable Integrated Delivery and Tracking of PROTAC Nanodegraders**
Carlos Alonso-Moreno
- P - 3 **Comparative DNA Interaction of Naphthalimide Derivatives Using Docking and UV-Vis titration**
Huda Alsaeedi
- P - 4 **DNA Interaction of Thiadiazole-Based Schiff Bases and Their Reduced Analogues**
Ali Alsalmeh
- P - 5 **Utilization of agro-wastes as a substrate for Polyhydroxybutyrate (PHB) production using Pseudomonas stutzeri PSB1**
Mohammed Alshammari
- P - 6 **Polyelectrolyte-Brush-Grafted Cellulose Membranes Decorated with Gold Nanostructures for Uric Acid Detection**
Abdullah Alswieleh
- P - 7 **A DOP-based bioorthogonal templated ligation: from reaction scope expansion to a robust DNA detection platforms**
Mattia Amariglio
- P - 8 **Cleavable AgroDrug Conjugates for the Increased Effectiveness of Non-Systemic Agrochemicals**
Alexander Apostle
- P - 9 **DESIGN AND SYNTHESIS OF STREPTOCOCCUS PNEUMONIAE SEROTYPE 6A/6C OLIGOSACCHARIDES AS VACCINE ANTIGENS**
Giusi Aresta
- P - 10 **BOIMPY: New Multiphoton-active Dyes for Imaging of Sub-cellular Structures.**
Connor Armstrong
- P - 11 **Ionic Liquids as Molecular Stabilizers for Nucleic Acids: Achieving Long-Term Stabilization and Functional Stability at Room Temperature**
Ananya Asmita

• • • • •

- P - 12 **Development of DES-Modified Lignin Nanoparticle and Nanodiamond-Based Smart Nano-Drug Delivery Platforms for the Treatment of Glioblastoma**
Ceren Aytar

P - 13 **Development of potent and selective PINK1 inhibitors**
Ali Baghirov

P - 14 **Bis-thiol Selective Biocompatible Chemistries and Applications to Antibody Conjugates as Targeted Therapeutics**
James Baker

P - 15 **Development of fluorinated lipid nanoparticles as gene delivery carriers**
Martina Beccalli

P - 16 **Activity based (bio)sensor for the monitoring of MutYH DNA glycosylase activity**
Erica Belforte

P - 17 **Indolobenzazocine-Derived Schiff Base and Its Copper(II) Complex as Potential Bioactive Agents**
Alexandra Birzu

P - 18 **Advanced Shape Memory Polyurethanes for Tendon Tissue Regeneration**
Beatrice Lucia Bona

P - 19 **Engineering of near infra-red bioluminescent reporters for in vivo bioimaging and biosensing**
Clara Bonin

P - 20 **Synthesis of piperidine-based profluorescent nitroxides and evaluation of their sensing properties**
Sasikan Boonsanong

P - 21 **Beyond the Cavity: Tuning Substrate and Product Selectivity through Supramolecular Confinement**
Francesca Bordignon

P - 22 **3D Bioprinted Tissue Models, Impact of Glycosignature and Morphology in IBD**
Ilaria Borghi

P - 23 **Integrating Molecular Dynamics with Self-Assembly Characterization of Peptides for Antimicrobial Applications**
Flavia Borrelli

P - 24 **Tackling Pancreatic Ductal Adenocarcinoma with an Innovative Covalent Targeting of Glycolysis**
Chiara Borsari

ISBOC-14

14th International Symposium on BioOrganic Chemistry - Milan, June 21-24, 2026

- P - 25 **Development of Novel Solid-Phase Synthesis for Nucleoside Mono-, Di- and Triphosphates and their Use to Detect DNA Replication in Malaria Parasites**
Anne-Sophie Braun
- P - 26 **Modular Quantum Dot Nanoprobes for Targeted pH Sensing at the Plasma Membrane of HER2+ Cancer Cells**
Iván Bravo Pérez
- P - 27 **Substituted Norcaranes as Mechanistic Radical Clock Probes: Characterization of Radical Rearrangement**
Julia Buczynski
- P - 28 **Synthesis of Acinetobacter baumannii LAC-4 Polysaccharide Fragments**
Mohini Burnwal
- P - 29 **Green Chemistry Metrics of Protein Extraction Protocols from Canola Meal**
Kristian Caldo
- P - 30 **Target synthesis of Acinetobacter baumannii oligosaccharide fragments from ATCC 17961 and ATCC 17978 strains**
Rachel Carpaye
- P - 31 **Bio-derived hybrid functional materials based on pyroglutamic acid and organosilicon moieties**
Antonia-Francesca Cojocariu
- P - 32 **Rational design, synthesis and evaluation of novel GSA-10 analogues for their remyelination activity**
Annalisa De Cicco
- P - 33 **Development of a Tailor-Made Fluorophilic Enrichment Platform for Non-Covalent Protein Fishing**
Riccardo De Simone
- P - 34 **Reformulating Propofol for enhanced solubility and lower dose requirements**
Evan Debnath
- P - 35 **A chemogenetic strategy for tracing cellular history into protein assemblies**
Lina El Hajji
- P - 36 **Deciphering the molecular recognition code of S1 sulfatase towards sulfamate and sulfate substrates**
Stefano Elli
- P - 37 **GLYLOID® Functionalization with Boronic Acids: Toward New Functional Polysaccharide Materials**
Emiliano Esposito

14th International Symposium on BioOrganic Chemistry - Milan, June 21-24, 2026

- P - 38 **New-Generation Self-immolative Spacers for the Release of Anticancer Drugs from ADCs**
Mattia Failla
- P - 39 **Determination of the antioxidant capacity of hydrophilic and lipophilic extracts from algae of the southern Peru.**
Sheyla Julissa Figueroa Valencia
- P - 40 **Fluorinated Janus-type Dendrimer-Based Nanocarrier for Nucleic Acid Delivery in Amyotrophic Lateral Sclerosis In Vitro Models**
Lorenzo Fumagalli
- P - 41 **sp²-Iminosugar Trimannosyl Glycolipid Mimetics as a New Class of TLR4 Antagonists**
José Manuel García Fernández
- P - 42 **Preventing biofilm formation through silica-based nanoparticles functionalized with natural compound derivatives**
Arianna Gelain
- P - 43 **Structural insight into C-5 modified β -Fucosides Targeting the BC2L-C Lectin of B. cenocepacia**
Arianna Gorgoni
- P - 44 **Copper-Catalyzed Intermolecular Asymmetric Dearomation of Indoles via Nitrene Transfer**
Chang He
- P - 45 **Targeting Human Antigen R (HuR): Advancing from Small Molecule Inhibitors to PROTACs**
Salma Hesse
- P - 46 **Enzyme-Activated Orthogonal Proteolysis Chimeras for Tumor Microenvironment-Responsive Immunomodulation**
Ming Yao Ho
- P - 47 **Analytical Identification and Quantification of Bornyl Acetate in Amomum villosum by HPTLC and GC-MS**
Jaehee Hyun
- P - 48 **Effect of drying methods on Fludioxonil and Tebufenozide Residues in Welsh Onion**
Jaebin Im
- P - 49 **Monitoring and Risk Assessment of Pesticide Residues in Fish species Using GC and LC-MS/MS**
Jaebin Im
- P - 50 **Light-Controlled of Protein-Ligand Affinity: Photoswitchable Binding of Photochromic Ligands to Hen Egg White Lysozyme**
Taeko Inada

P - 51 **Synthesis, structural studies, and determination of the pharmacokinetic profile of new phosphonate derivatives of fluorinated acetanilide**
Klaudia Jaworska

P - 52 **Development of efficient purification methods for circular mRNA**
Shiryu Kajihara

P - 53 **Synthesis of Novel Imidazole Derivatives and Evaluation of the Growth-Stimulating and Myelostimulating Activities of their β -CD Inclusion Complexes**
Altynay Kaldybayeva

P - 54 **Investigating the Impact of Ibuprofen-Contaminated Water on the Chlorophyll Levels of *Lemna minor***
Beliz Kasacı

P - 55 **A ratiometric pH sensor for Gram-positive and Gram-negative bacteria.**
Dorothea Kossmann

P - 56 **Fluorescent Cationic Fluorinated Oxazoliniums for Cysteine Bioconjugation via SNAr Reaction**
Karen Kung

P - 57 **Cluster-triggered emission biopolymers for the development of photonic applications**
Agustín Lara-Sánchez

P - 58 **Pesticide-Induced Acetylcholinesterase Regulation and Human Neuroblastoma Cells Cytotoxicity via a Microfluidic Platform**
Ching- Kuo Lee

P - 59 **α -Aminophosphonate- β -Cyclodextrin Complex as a Promising Plant Growth Biostimulant**
Aigul E. Malmakova

P - 60 **Local Anesthetic Activity of the β -Cyclodextrin Inclusion Complex**
Aigul E. Malmakova

P - 61 **Lipid Droplet Response to Glucose in Fibroblast Cells Using Multiphoton-active Red-emitting BODIPYs**
Paolo Mastroeni

P - 62 **Photoresponsive Azobenzene Ligands for G-Quadruplex DNA: Synthesis and In Vitro Studies**
Aleksandra Matusiak

P - 63 **High-pressure SAXS studies of selected model lipid nanostructures**
Jakub Męch

• • • • •

- P - 64 **Glycoglycerolipids as Versatile Anchors for Bioactive Molecules in Quantum Dot-Based Biosensing Platforms**
Laura Morelli

P - 65 **Development of Orthogonal Methods for Comprehensive Characterization of Oligonucleotide Drug Products and Impurities**
Giorgio Eisele

P - 66 **Calcium-Induced Micellar Disruption: Evaluating the Bioaccessibility of Vitamin D in Fortified Oat Milk**
Ceren Özçelik

P - 67 **NMR real-time analysis of exo-metabolites decodes the mechanism of action of antibacterial molecules, nanoparticles, and materials**
Laura Ragona

P - 68 **Collectin-11 Antagonists in a Therapeutic Approach to Minimize Complement-Mediated Immune Injury**
Fabricio Ramírez Cortés

P - 69 **Natural and engineered methyltransferases for biocatalytic terpene precursor modifications**
Tatjana Reuter

P - 70 **AI Agent and Collaborative Robotic Platform for the synthesis of tissue mimics**
Laura Russo

P - 71 **Fluorescent Tracers for $\alpha V\beta 6$ Integrin-mediated Imaging of Pulmonary Fibrosis**
Andrea Sartori

P - 72 **Identification of Natural Chemotypes as KPC-3 Carbapenemase Inhibitors**
Beatrice Sciarra

P - 73 **Enhancing Glioblastoma Therapy with Multivalent Glycomimetics**
Lucy Spicer

P - 74 **Inflammation at the Crossroads of Metabolism and Disease: Modulating TLR4/TLR2 to Redefine Diabetes and Systemic Pathology**
Lucrezia Spinelli

P - 75 **Molecular Modeling of Indolobenzazocine Derivatives as Potential Anticancer Agents Targeting Tubulin**
Alexandru-Constantin Stoica

P - 76 **Synthesis and Characterization of Antibacterial and Hydrolytic Resistant Quinuclidine-Containing Methacrylamide Monomers for using in Dental Resin Adhesive**
Veerapat Suksai

14th International Symposium on BioOrganic Chemistry - Milan, June 21-24, 2026

- P - 77 **Artificial nanocarriers inspired by extracellular vesicles targeting mechanisms**
Giulia Tamboia
- P - 78 **Ethynylbenzaldehydes as novel reaction-based “turn-on” fluorescent probes for sensitive primary amine detection in liquid, vapor, food, proteins, and cellular systems**
Ajcharapan Tantipanjanorn
- P - 79 **Investigation on the multivalent effect on the immune response to glycan antigens: Shigella flexneri 2a as a model**
Tom Thouvenin
- P - 80 **Stimulus-Responsive Mechanically Fibrillated Silk/Chitosan gels for Advanced Ibuprofen Delivery Systems**
Ngoc Phan Tran
- P - 81 **Ferritin-polyamine conjugates for targeted delivery of siRNA**
Despoina Varouhaki
- P - 82 **Chemo-enzymatic flow synthesis of enantiopure piperidines**
Sara Vicinanza
- P - 83 **Starving the beast: Exploiting the molybdate transporter ModABC to combat Clostridium perfringens infections**
Julia Wieruszewska
- P - 84 **Genetically-targeted and red-emitting fluorescent indicators for subcellular zinc imaging**
Manon Wittwer
- P - 85 **Fluorescent Pentacyclic-fused Pyranoquinoliziniums for Molecular Imaging and Photoredox Catalysis**
M K Wong
- P - 86 **Direct palladium/carboxylic acid-catalyzed tandem allylation of o-phenylenediamines with but-2-ene-1,4-diol in water**
Shyh-Chyun Yang
- P - 87 **Targeting EndoG by small molecules to modulate neurodegeneration**
Hanna S. Yuan
- P - 88 **Conjugated Oligoelectrolytes as Optical Probes**
Jiyu Zhu
